ABSTRACT

25X1D This report updates previous basic reporting on three of the major electric power plants in Kiangsu Province, eastern China. It also includes initial basic reports on two other thermal power plants at Chen-chiang and Huai-yin. The cutoff date for information is [REDACTED]

25X1D Chen-chiang Thermal Power Plant Chien-pi-chen has been under construction since it was first observed in [REDACTED] it contained possibly six operational boilers and at least two more under construction.

25X1D Huai-yin Thermal Power Plant Ching Chiang was complete and operating when it was first observed in [REDACTED] A major expansion program, consisting of the construction of two additional boiler-generating units and a new coal handling and processing facility, was completed by [REDACTED]

25X1D [REDACTED]
25X1D [REDACTED] No changes were observed at Nan-ching Heat and Thermal Power Plant Ia-chang-chen.

INTRODUCTION

A total of ten major electric power plants in Kiangsu Province have now been reported in Basic Imagery Interpretation Reports. This report fulfills the FY-72 requirement for updates and initial reports on the following facilities (see Figure 1).

1. Chen-chiang Thermal Power Plant Chien-pi-chen.
2. Huai-yin Thermal Power Plant Ching Chiang.
3. [REDACTED]
4. Nan-ching Heat and Thermal Power Plant Ta-chang-chen.

BASIC DESCRIPTION

Chen-chiang Thermal Power Plant Chien-pi-chen is located on the south bank of the Chang Chiang (Yangtze River), about 7 nautical miles east-southeast of Chen-chiang. The plant is partially secured by a wall or fence. Coal is delivered to the plant by boat or barge. No rail lines enter the plant area.

In [REDACTED] the plant consisted of a boilerhouse with possibly six boiler units and at least two others under construction, a generator hall, a switching yard, a control house, coal storage and handling facilities, three stacks, and a water pumphouse (see Figure 2).

The plant was first observed under construction in [REDACTED]. By [REDACTED] the northern stack and adjacent boilerhouse and generator hall were complete. The remaining portion of the generator hall and the middle portion of the boilerhouse were complete by [REDACTED].

The plant was first observed operating in [REDACTED] when smoke was coming from the northern stack. In [REDACTED] this stack was again observed emitting smoke. On the latest coverage in [REDACTED] the middle section of the boilerhouse had become operational and smoke was coming from the middle and northern stacks. The plant was not operating in [REDACTED].

25X1D				NA

BASIC DESCRIPTION

Huai-yin Thermal Power Plant Ching Chiang is located within the city of Huai-yin. The plant is partially secured by a wall or fence, and the two switching yards are totally secured by walls. Coal is delivered to the plant by boat or barge. No rail lines enter the plant area. (See Figure 3.)

25X1D On the most recent photography in [REDACTED] the plant consisted of three boilerhouses, three generator halls, four stacks, two switching yards, at least four transformers, a control house, a coal conveyor and storage facility, three fuel oil storage tanks, and a probable water treatment facility.

25X1D In [REDACTED] when the plant was first seen on photography, the northern and middle boilerhouses and corresponding generator halls were present.

25X1D [REDACTED]
25X1D [REDACTED] Except for one boiler unit and a generator, all of these components were complete and operational
25X1D [REDACTED] The boiler unit and generator may have become operational by [REDACTED]

25X1D [REDACTED]
25X1D [REDACTED]
The middle boilerhouse was observed operating on all referenced coverage [REDACTED] The southern boilerhouse was operating in [REDACTED]
The northern boilerhouse has never been observed operating and may be used for standby purposes.

BASIC DESCRIPTION

25X1D No changes have been observed at the Nan-ching Heat and Thermal Power Plant Ta-chang-chen since the date of the latest imagery used in the previous report.

25X1D The plant was operating in as indicated by smoke coming from the stack (see Figure 5).
